Bringing user needs to EU GOVSATCOM

European **N**etworking
for satellite **T**elecommunication
Roadmap for the governmental
Users requiring **S**ecure, in**T**eroperable,
Innovativ**E** and standardise**D** services

Why ENTRUSTED?

To have an overview of the governmental and institutional users of secure SatCom services, their needs and associated requirements.

ENTRUSTED is one of the preparatory activities for EU GOVSATCOM – a new component of the European Union Space Programme (2021–2027).

Project findings will inform future regulations regarding GOVSATCOM operational requirements, service portfolios, sharing and prioritization, and security requirements.

Coordinator: European Union Agency for the Space Programme (EUSPA)
Time frame: September 2020 – February 2023
Budget: ca. 3M €

Project objectives

- Establish a Network of governmental Users (NoU)
- Identify user needs and establish a consolidated set of user requirements for secure SatCom systems
- Develop a synergies-map for the uptake of secure SatCom services
- Elaborate a R&I roadmap for secure SatCom user technology

Expected results

- Cooperation and exchange of information within a representative network of governmental users
- Uptake of governmental satellite communication solutions among users from EU Member States
- More effective decision-making on investments in secure SatCom systems

IDENTIFICATION OF USER NEEDS & REQUIREMENTS

- Identification of user communities
- Collection of information on user needs & use cases
- Formulation of user requirements

ANALYSIS OF SATCOM USER TECHNOLOGY

- Review of the latest SatCom user technology and enabled services
- Analysis of future trends
- Identification of key technological factors

R&I ROADMAP DEFINITION

- Review of relevant R&I projects
- R&I gap analysis
- Definition of necessary R&I activities

NETWORK OF USERS (NoU)

ENTRUSTED consortium

ENTRUSTED

13 EU Member States
7 EU Entities

Direct implementation of the ENTRUSTED project

SATCEN   JRC   EUSPA   EMSA   EFCA   EEAS   EDA

external collaborators

2 EU Member States
3 EU Entities

FRONTEX   EUROPOL   DG ECHO

Early access to project results

Involvement in ENTRUSTED activities

exchange of information, collaboration, mutual learning

Interactions with potential GOVSATCOM users

border authorities · maritime authorities · law enforcement bodies · civil protection · humanitarian aid · military forces · EU external action · key infrastructures operators
